

A card that makes money for you.

Tap to pay. Own a piece of the shops you already buy from.

September 2026

THE PROBLEM

Businesses cannot grow. People cannot build wealth.

01

Small businesses cannot get capital

Banks do not lend to shops. The few loans that exist cost more than the shop earns. So the shop stays small.

02

Card systems take and give nothing back

Rented terminals. Fees decided abroad. Taps that fail. Money that arrives tomorrow. None of it was built for a Nigerian shop.

03

Ordinary people cannot build wealth

Savings lose value every year. The stock market is for the few. There is no simple way for a worker to own a growing business.

One card. The shop gets paid and funded. The customer gets a share.

Freedom is a payment card on our own rails. Every tap pays the shop today, and turns a small part of the spend into shares the customer keeps.

HOW IT WORKS

Three steps, every time you pay.

1

Tap your Freedom card

At any shop on the network. No app to open, nothing to learn.

2

The shop gets paid

Straight to its own bank account, in seconds.

3

You get shares in that shop

A small part of what you spent comes back to you as ownership.

FOR YOU

Your card. Your wallet. Your shares.

Everything the card earns lives in one place, and it is yours to keep or sell.

Add money	Top up in naira by bank transfer, or in digital dollars.
See what you own	Every shop that gave you shares, and what they are worth today.
Sell when you want	After 120 days your shares can be sold on Freedom Exchange.

FOR THE SHOP

Customers who own a piece of you come back.

A phone is the terminal. A share is the reward.
The exchange is where you grow.

Get paid instantly

Every tap lands in your own bank account. No terminal to rent; your phone accepts the card.

Reward with shares, not discounts

A share costs you less than a discount, and it keeps the customer for years.

Get listed

Put your business on Freedom Exchange and raise money from the people who already shop with you.

FREEDOM EXCHANGE

A market for everyday businesses.

A fair price

The exchange sets each listed business a price from its accounts, and updates it every trading day.

Buy and sell

Customers can sell the shares they earned, or buy more of a shop they believe in.

Raise money

Businesses raise from the people who already shop with them, not from a bank that will not answer.

TODAY

It is live, and it works.

The card, the wallet, the shop app and the exchange: all built, all running.

- ✓ Real cards tapping at real shops
- ✓ Shops paid to their bank in seconds
- ✓ Shares landing in customers' wallets
- ✓ First businesses listed on the exchange

THE MARKET

Nigeria already pays by card and phone.

**~~₦~~1.07
quadrillion**

WHY US

We are not starting from zero.

We own a bank

Payments settle on our own rails, not on a partner's.

Cards spend in four countries

Nigeria, Kenya, Uganda and Tanzania, funded in naira or digital dollars.

The product is built

The card, the wallet, the shop app and the exchange are live today.

HOW WE EARN

We earn when the network is used.

A small fee on every tap

A fraction of each payment, the way every card network earns.

Shops pay to reward

Shops fund the shares their customers earn, instead of paying for discounts.

Fees on the exchange

When a business lists, and when shares change hands.

THE NEXT TWELVE MONTHS

From the first shops to ten million cards.

MONTHS 1 TO 3

100,000

Prove the loop in one city: enough shops that the card is worth carrying.

MONTHS 4 TO 8

1.3 million

Every new shop makes the card worth more. Every new card makes the shop worth more.

MONTHS 9 TO 12

10 million

Nigeria at depth, then Kenya, Uganda and Tanzania on the same rails.

A card that makes money for you.
